Waypoints/Routes/Tracklogs	1000/50/10K
High Sensitivity GPS	Yes
Battery Life	Approx 20 Hours (2xAAA not included)
Data Transfer	USB + Unit - Unit

Outdoor navigation meets touchscreen simplicity in Dakota 20. This rugged, palm-sized navigator combines touchscreen navigation, high-sensitivity GPS with HotFix™ satellite prediction, barometric altimeter, 3-axis electronic compass and microSD™ card slot in one affordable, power-packed punch.

Touch and Go

Dakota 20 makes outdoor navigation effortless with a tough, sunlight-readable, 2.6 inch color touchscreen display. The interface is easy to use, so you'll spend more time enjoying the outdoors and less time searching for information. Both durable and waterproof, Dakota 20 is built to withstand the elements: bumps, dust, dirt and water are no match for this rugged navigator.

Get Your Bearings

Dakota 20 has a built-in 3-axis electronic compass, which shows your heading even when you're standing still or not holding the device level. Its barometric altimeter tracks changes in pressure to pinpoint your precise altitude, and you can even use it to plot barometric pressure over time, which can help you keep an eye on changing weather conditions. And with its high-sensitivity, WAAS-enabled GPS receiver with HotFix™ satellite prediction, Dakota 20 locates your position quickly and precisely and maintains its GPS location even in heavy cover and deep canyons.

Find Fun

Get into paperless geocaching with Dakota 20 by quickly downloading up to 2,000 caches, with information such as location, terrain, difficulty, hints and description — no more paper print outs and manually entered coordinates.

Explore the Terrain

Dakota 20 comes with built-in worldwide basemap, so you can navigate anywhere with ease. Adding more maps is easy with Garmin's wide array of detailed topographic, marine and road maps, available on microSD card.

Share Wirelessly

With Dakota 20 you can share your waypoints, tracks, routes and geocaches wirelessly with other compatible Dakota, Foretrex®, Oregon® and Colorado® users. Now you can send your favorite route or geocache location to a friend easily. Just touch "send" to transfer your information to similar devices.

Dakota 20: Touchscreen navigation for the great outdoors.

Included in the ALS package with the Dakota 20 comes one map of your choice: either, Scotland, Northern England and the Midlands or Southern England and Wales 1:50K

Topo Regions on Micro SD Card

These Pre-programmed microSD cards are compact, small size makes it easy to pack light and add maps to your compatible unit. Just plug these cards into your Garmin Dakota 20, and you're ready for the great outdoors.

Topo SD card for (Scotland)

Covering the whole of Scotland, including the Shetland, Orkney and Hebrides Islands and the English border to Newcastle upon Tyne to include the whole of the Northumberland National Park and the Kielder Forest Park. 1:50K

Topo SD card for (Northern England & The Midlands)

Covering North England from the Northumberland National Park and the Kielder Forest Park south to the Midlands. In the east, covering to Lowestoft and the Norfolk Broads. In the west, covering the northern part of Wales, including the Snowdonia National Park. 1:50K

Topo SD card for (Southern England & Wales)

Covering Wales entirely and England from the Peak District National Park, Sheffield and Nottingham to the whole of the South, including the Scilly Islands and the Isle of White. 1:50K
