GT08 Bee Log Set

- Pollinating Bee Log
- FSC Guide to Bees of Britain

This Pollinating Bee Log is the natural home for Mason Bees and other Solitary Bees as well as a variety of overwintering insects. Vital for pollinating fruit, vegetables, herbs and flowers, these bees are non swarming and non aggressive and are safe with children and pets. The Log is designed to give good insulation (does not require moving inside in winter) and is filled with natural nesting tubes for the bees.

SITING - The Log can be hung on a wall or from trees, pergolas or pole systems with the special strengthened seagrass hanging ropes. Position in a warm place near nectar sources to catch the morning sun. Ideally 3ft to 7ft high (up to 3 mtrs). PLEASE NOTE THE HANGING ROPE MATERIAL MAY VARY

DIMMENSIONS 160x160x160 - 1.5KG
