

12v 8Ah Lithium Ion Battery Pack with Fuel Gauge

Protective Carry Case

AC Mains Charger

DC Vehicle Charger

Cigar Plug Output Connector

Accurate Fuel Gauge

Lithium battery packs offer tremendous advantages over traditional sealed lead acid/Gel batteries.

- Extremely lightweight ~600g
- Smaller physical size L=15.3cm W= 8cm D= 3.8cm
- The built in fuel gauge lets you know how much power is left in your battery.
- Longer lasting discharge (flat discharge curve meaning the light stays brighter for longer)
- Battery automatically switches off when less than 10% charge is left to prevent over discharge
- Charging 8-12 hours.
- Overcharge and short circuit protected
- Robust ABS case with quality canvas belt case
- AC mains charger
- DC vehicle charger on all models
- Canvas carry pack with belt loop
- Supplied with 12V cigar adaptor
- Boost charger available cutting charging times by 50%, contact us for details.

This Lithium Ion Power Pack from ALS will make you wonder how you managed to carry large and heavy sealed lead acid battery packs. Lithium battery packs have improved power delivery as well as being one third of the weight when compared to the sealed lead acid equivalent. The lightweight battery pack is enclosed in an attractive green and black shock absorbing case, designed to slip easily into a large pocket or into the outer canvas case.

Fuel Gauge

The built in fuel gauge lets you know how much power is left in your battery. Simply press the button to illuminate the display giving an accurate indication. Intelligent fuel gauge let's you know the power status of your battery.

Simply press the button to display the lights

3 green and 2 red	75 -100% capacity
2 green and 2 red	50 -75% capacity
1 green and 2 red	20 - 50% capacity
2 Red	10 - 20% capacity - Recharge as soon as possible
1 Red	Less than 10% - battery about to electronically
No Lights	Empty - recharge within 12 hours
