

ALS Ring Slides & Vinyl Props

DS05a ~ 19mm Ring Slide - Ideal for setting some of the larger genitalia without flattening or having the cover slip pivot, ultimately keeping a 3-D profile. Invaluable for some species. 19mm cover slips would also be required with the ring slides

DS05b ~ Vinyl props – Useful for raising the cover slip and helping stop pivoting, a problem in some of the larger genitalia. Note, even the 1mm props are only useful for medium sized specimens. For the bigger species use the Ring Slides.
