

Sallow Clearwing (*Synanthedon flaviventris*)

A new single lure **sal** is now available for this species and is sold separately to the classic six or full set due to its biennial life cycle in the UK and scarce distribution.

In the UK it appears in even years but on the continent will occur annually. This new lure was successfully trailed in Belgium in 2011.

Despite very unfavourable weather conditions during Britain in 2012 the new lure proved very effective at several sites in Berkshire and North Hampshire (D Cooper pers. comm.) with reasonable numbers attracted throughout July up to 7:30pm.

377 Sallow Clearwing (*Synanthedon flaviventris*)

Sallow Clearwing ~ Keith Tailby
