

The Honda EU10i

The Honda EU10i *small super quiet* Honda generator is extremely portable (at only 29 lbs / 13Kgs.) as well as fuel efficient, the Honda EU10i generator will *run up to 8.3 hours on a single tank* of fuel when used with the Honda Eco Throttle feature. This easy starting Honda generator produces only 59dB of sound at 7 meters running at full load, which is less than common speech.

The Honda Inverter Technology makes this Honda generator ideally suited for use with sensitive electronics (e.g., computer, printer, and other sensitive electronic equipment) because this Honda generator produces a clean sine wave of energy that prevents surging. To prevent any possible damage to this Honda Generator, the Honda Oil Alert system will shut the unit off when the oil drops below a safe operating level.

This Honda Generator also has a DC terminal for use when charging 12-volt automotive type batteries.

Two like Honda EU series generators can be linked in parallel to increase available wattage through the Honda generator outlets.

Features:

- 12 volt DC output
- 52dB(a) at 7m @ 1/4 load
- 13kg
- 8.3 hours @ 1/4 load
- Inverter technology
- Stylish and ergonomic design
- 12 volt DC output
- 13 amp socket

Specification:

Max HP	1.8
Sound Level (DB)	52
Output (kw): Rated	0.9
Max	1
Output Voltage (V)	230
Continuous Operating Hours Without Refuelling at Rated Load	3.6-8.3
Dimensions (mm)	L:450, W:240, H:380
Dry Weight (kg)	13
Fuel Type	Petrol
